

Meeting Minutes – Technical Direction & Research Planning

Prepared by: Anandhu Raveendran (24254189)

Date: 03 October 2025

Project: Language-Based Geographic Reasoning System

Attendees: Whole group

Key Decisions

- Proceed to integrate the real API into the frontend.
- Use the backend SQL accuracy sheet as the source of truth for reporting query correctness.

Updates

- **Backend / Evaluation:**
 - Showcased backend testing to the client.
 - Presented the updated backend SQL accuracy sheet (query correctness/accuracy).
- **Frontend:**
 - Demonstrated the website working with the mock API to the client.

Action Items

- **Anandhu:** Integrate the real API and update the Result page (including the suggestions section and related UI/logic).
- **Team (supporting):** Provide any required endpoint details and sample queries to unblock integration.
